

ALFRED STOLL

DIGITAL ARTIST

»Digital artist with an excellent background in related fields such as architecture, industrial design and interior design experimenting with New Media on a smartphone with the index finger in Metamodernism. I play with post-irony, sensuality, tenderness and the grotesque. In the process, I integrate artworks from other epochs and interact with art objects in classical, digital, Augmented- and Mixed-Reality formats. I am convinced that people can experience maximum aesthetic pleasure through immersion in the atmosphere and participatory communication with the art object. Aesthetics and beauty are a responsibility I want to carry for our society. Besides art, I am also passionate about architecture, fashion and dancing. I see every challenge as an excellent opportunity for my own development. My gender pronouns are he/she/they.« - Alfred Stoll
